About the Event

This year's event will focus on onward referral of clients to services outside of your own. When should we be referring on? How do we ensure that the client or service user feels supported in the referral? How should we be supporting counsellors and counselling skills workers to refer on their clients and service users? We have a keynote speaker, Christiana Melam, from the National Association of Link Workers (NALW) who will talk to us about Social Prescribing. Following that we will be discussing the benefits and pitfalls of referring outside of your own service.
